

KantanMT is the number one provider of Custom Machine Translation (CMT) in the world.

Our CMT solution enables faster, lower cost localization for some of the world's leading automotive giants.

Scalable Machine Translation Solutions for the Automotive Industry

KantanMT is the world's leading provider of Custom Machine Translation (CMT). We deliver reliable, high quality translation solutions in over 760 language pairs, so our automotive clients can accelerate entry into global markets, increase revenue and protect brand equity.

We recognise your problem

Challenged with a growing number of vehicle models and language combinations, a highly efficient localization process is essential to delivering high quality content to car owners, technicians, agents and staff.

At KantanMT, we specialise in providing high speed, high quality CMT solutions that face these challenges head on, helping our clients access new revenue opportunities by reaching new markets faster, and at a lower cost.

How we deliver to our Automotive Clients

We leverage the power and flexibility of the cloud to provide clients with Machine Translation (MT) that can be highly customised to automotive content. Deployed at speed, our clients can break the language barrier to get products to new markets first.

Our translation technology helps maintain consistency across brand technology and standards, ensuring excellent returns for globalization efforts.

How We Help Our Clients

Custom Automotive MT engines: Engage customers, agents and service staff with content in their language. Custom KantanMT engines leverage Translation Memory (TM) and MT to **deliver at least 30% in localization savings** for automotive translations.

Fast Deployment and Peak Demands: With features such as [KantanSwift™](#) and [KantanAutoScale™](#), our clients can deploy and scale KantanMT engines to **translate large word volumes** in tandem with product release cycles.

Localization Precision: KantanMT's capacity to process over **100 million words per day**, coupled with customisation technologies such as KantanNER™ (Named Entity Recognition) and [Post-Editing Automation \(PEX\)](#), our clients can achieve high quality translations in a timely and cost effective manner.

Security Guarantee: [KantanMT.com](#) is hosted on [Amazon Web Services \(AWS\)](#), the safest and [most secure and confidential](#) cloud hosting service in the world. To ensure utmost security for client information, KantanMT triple encrypts client data to ensure that only our clients access their own content.

Integrated Project Management: The [KantanAPI™](#) enables clients to **integrate their existing localization workflows** into [KantanMT.com](#). Analytics tools such as [KantanAnalytics™](#) provide transparency of translation quality estimation, enabling efficient planning of localization projects.

Maintain Brand Identity: KantanMT provides powerful terminology management capabilities. Custom KantanMT engines translate brand content and terminology consistently so that brand identity is maintained, regardless of the target language.

A world of Automotive Experience

Leading Global Vehicle Manufacturer

KantanMT delivered a **25% increase in translation productivity** in the translation of technical documentation. We now provide a scalable solution for translation of up to **50 technical manuals per year**.

ChromeData, Vehicle Content Provider

Chrome Data is the content provider to over 6,000 websites and 17,000 dealerships. They use KantanMT to translate large volumes of content into **4 languages with over 70% increase in translator productivity**.

Europe's No. 1 Truck Manufacturer

KantanMT was used for translating a large **300k words** motor parts catalogue. Content was required in 3 languages with turnaround time of 4 weeks. With KantanMT **localization cost was reduced by 28%**.

Why KantanMT.com?

KantanMT.com is a leading Software-as-a-Service Custom Machine Translation platform that enables users to develop and manage scalable Statistical Machine Translation engines in the cloud. The innovative technologies offered on the KantanMT.com platform allows users to easily build MT engines in over 760 language combinations, seamlessly integrating into existing localization workflows and web applications.
